EXPERIENCE

Technical Support Engineer, WiseStep	2025 - Present
• Serve as the first/second line of defense for incoming technical queries via email, phone, chat. • Diagnose, troubleshoot, and resolve software faults (application requirements, crashes, freezes, network connectivity) and customer's hardware issues. • Set up, configure applications for new customers. • Install, update, and configure licensed software, operating systems (Windows, macOS, Linux), and security tools. • Worked continuously on tasks until resolved with proper lesson-learned documentation. • Researched, tested new softwares, frameworks, devices for product improvement.	

ACHIEVEMENTS

9th Place - KOHKER OSINT CTF:

- Achieved 9th place out of 100+ participants in the KOHKER OSINT Capture The Flag competition. Demonstrated advanced **open-source intelligence (OSINT)** skills by solving complex challenges, including geolocation, clue analysis, and investigative research, accurately pinpointing locations and extracting critical information under time constraints.

Project Leadership and Innovation:

- Guided a team to compete in a competition hosted by the **Union of Youth Federations of Cambodia (UYFC)** on "Empowering Young Entrepreneurs," presenting **WiseStep**, a web-based

platform designed to assist high school students and young adults in choosing academic majors, identifying suitable universities, and exploring career insights.

Founder and Co-Founder:

- Founded [DELUX](#), an on-demand tool to solve the long existing problem of online sellers enabling them to generate more sales by mitigating the repetitive tasks during their live streams.
- Co-Founder of [WiseStep](#) - Originally a community driven project. Currently converting to a digital service provider startup serving digital solutions to different industries.

LANGUAGE

- **Khmer:** Native
- **English:** Writable & Speakable
